Career Objective

I'm a passionate Backend Developer focused on building secure RESTful api with NodeJS & Typescript

Skills

Frontend: React, Tailwind CSS

Backend: Node.js, Express, REST APIs

Database: MongoDB, MySQL (basic)

Tools: Git, SSLCommerz, Zustand, Cloudinary

Languages: JavaScript (ES6+), Typescript, Java (Intermediate)

Deployment: Vercel, Netlify, Render

Projects

LMS - Fully functional LMS (Backend) [Github Link](#)

- Created a TypeScript and Express backend for a travel booking platform using MongoDB.
- Role-based access control, Bcrypt security, and JWT authentication were implemented.
- Cloudinary media uploads, SSLCommerz payments, and dynamic booking/product features are all integrated.

MyNextTrip — Travel Agency Web App(Backend) [Github Link](#)

- Developed an Express application with roles for users, agencies, and administrators.
- Admin control, bookings, and profile management features are built in.
- Integrated REST APIs with authentication and secure cookie handling

RR-Commerce — An E-Commerce (Backend) [Github Link](#)

- created a backend application with Node.js, Express, React (Zustand for state), and MongoDB with JWT authentication.
- Features for managing users and admins, products, orders, reviews, and payments (COD & SSLCommerz) were developed.
- Cloudinary for images was integrated, and Helmet, Bcrypt, and Joi validation were used as secure practices.

Education

**Kurigram Polytechnic Institute,
Kurigram— Diploma**

Session: 2021–22

Computer Science & Technology.

Result : Ongoing

**Talimganj High School, Rangpur
— SSC**

Batch : 2021

Result : 4.83

Languages:

- Bangla (Native)
- English (Conversational)
