Projects

YourTutor – Fully Functional Learning Management System (Backend) [Github link](#)

- Made the backend system for a web learning site (LMS) with Express, TypeScript, and MongoDB.
- Set up secure sign-in for students, mentors, and admins using JWT + cookies, with safe session control.
- Built main parts for classes, sign-ups, meetings, payments, and feedback.
- Added Cloudinary and Multer to manage image and video uploads well.
- Used Zod to check requests and Nodemailer to send emails for checks and alerts.

MyNextTrip - Travel Agency Web App (Backend) [Github link](#)

- Built the back part of a travel booking site using Node.js, Express, and MongoDB.
- Put in place a JWT-based sign-in system with safe cookie saving and bcrypt for password safety.
- Put in SSLCommerz payment way that lets people pay online or with cash.
- Made parts for user, travel, booking, and admin tasks, using Cloudinary for putting up photos.
- Set up email checks and password changes using Nodemailer with codes that last for a short time.

EcoBazar - E-Commerce Platform (Backend) [Github link](#)

- Made a ready to use E-commerce backend with Express, TypeScript, and MongoDB in modular Pattern.
- Set up JWT sign-ins and role checks for users, sellers, and admins.
- Added SSLCommerz to handle online payments.
- Put together full parts for products, types, orders, carts, and reviews, using Cloudinary for pictures.
- Put in Nodemailer for email alerts, Joi for checks, and safe session control with cookies and bcrypt.
